

Please do not allow use of cell phones onboard aircraft. Any device that would not require speaking, such as text messaging, would be ok. That could include any device that makes NO sound - a laptop, PDA, or personal listening device with headphones. Anything that allows one person to disturb another should NOT be allowed. The potential for too much noise is not worth it. It's bad enough having crying children, or a seat mate who won't leave you alone. Can you imagine the sound of 200 people all talking at once in a small space? Please please do not allow this. Thank you.
